GITHUB
github.com/Pavan09-Is-Here

CORE SKILLS

Languages
Python, TypeScript, SQL, C, R, MATLAB, JavaScript

ML & AI
PyTorch, TensorFlow, Keras, Scikit-learn, Hugging Face, RAG Pipelines, Prompt Engineering

Computer Vision / NLP
OpenCV, YOLOv8, BERT, GPT fine-tuning, NLTK, Sentence Transformers

AI Product Engineering
FastAPI, SQLAlchemy, Next.js, React, Supabase, PostgreSQL, OpenAI API

Tools
Git, Linux, Jupyter, VS Code, PyCharm

EDUCATION

MSc AI & Robotics
University of Hertfordshire
Jan 2026 – Present

B.Tech AI & ML
Nalla Malla Reddy Engineering College
First Class Honours · GPA 7.68/10
Oct 2021 – May 2025

LANGUAGES

English	Fluent
Telugu	Native
Hindi	Proficient

RIGHT TO WORK

UK Student Visa holder — eligible for the Graduate Route Visa, providing 2 years of post-study work authorisation.

PROFILE

AI and Machine Learning graduate with hands-on, all-round experience across the AI stack — from training data quality and model evaluation to backend APIs, databases, and modern frontend interfaces. Comfortable working on computer vision, NLP, and LLM/RAG systems, and shipping full-stack AI products end to end. Strong mathematical foundations in linear algebra, probability, and optimisation. Seeking an AI Engineer role delivering scalable, high-impact AI solutions within a UK technology organisation.

WORK EXPERIENCE

AI Engineer 2025
Centific — Hyderabad, India

- Worked on NLP, AI training, and generative AI data quality tasks across LLM datasets.
- Reviewed dataset quality, task consistency, and output accuracy across annotation pipelines.
- Designed and applied prompt engineering strategies that improved model response quality to above 98% accuracy.
- Evaluated and refined AI model responses, supporting RLHF workflows used to fine-tune LLMs.

Freelance AI Trainer & Subject Matter Expert 2023 – 2024
Chegg / Outlier — Remote

- Provided expert-level solutions for complex technical and mathematical academic queries.
- Collaborated on AI training and data refinement projects for LLMs, ensuring 100% accuracy against strict deadlines.

AWS AI & ML Virtual Intern 2023
AICTE — AWS Academy, India

- Implemented cloud-based ML workflows covering data preprocessing, algorithm selection, and model deployment.
- Focused on building reproducible pipelines and foundational deployment practices on AWS.

KEY PROJECTS

LearnForge AI — AI-Powered Learning Platform

- Built an AI education platform for real understanding, with structured explanations, RAG-based retrieval, chat memory, and PDF export.
- Built backend APIs with Python, FastAPI, and the OpenAI API; used Supabase for conversation and user data.
- Developed the frontend with Next.js, TypeScript, and Tailwind CSS.

CareerPilot AI — Career Automation Platform

- Built a career automation platform on one rule: the system never invents candidate facts — every claim traces to a verified facts vault.
- Built truthful, ATS-friendly CV generation, compliance-gated job discovery, and explainable eligibility matching.
- Stack: FastAPI, SQLAlchemy 2, Next.js 16, React 19, TypeScript, PostgreSQL/Supabase.

Deepfake Video Detection — Final Year Project

- Built a hybrid CNN-LSTM model to detect spatial and temporal inconsistencies in deepfake video, using transfer learning with an EfficientNet backbone on FaceForensics++ and Celeb-DF.
- Deployed as a Flask web app with real-time video processing.

Crop Protection from Animal Intrusion

- Built a real-time CNN-based animal intrusion detection system trained on wild boar, deer, and other animal imagery, integrated with IoT sensors and Raspberry Pi for edge deployment.

CERTIFICATIONS & INTERESTS

- AWS AI/ML Virtual Internship** — AICTE, Completed 2023
- Interests:** Large Language Models & Generative AI, AI Ethics and Model Evaluation, Emerging AI Technologies, Cooking, Basketball.
